

Find out when U signed for the interest-only loan & if that actually WAS 5 yrs.

(Even if it was what is the language? in it that says it...)

Why would I sign for a loan that I KNEW was going to balloon from 2,200 - 5,200?

His lawyer's answer does NOT answer the question as to WHY... this went from a mortgage that I could afford to a mortgage that I KNEW I couldn't afford & why would any bank agree to such an absurd agreement, knowing that after 5 yrs they would have a property that the owner could not afford? Did they make an assumption about property-values that was ruined by the meltdown?
